## PROFILE

Early-career Data Analyst with a software background and hands-on practice in SQL and Python (data cleaning, EDA, reporting basics). Comfortable working with relational databases and translating findings into clear, business-friendly summaries. Seeking a Junior Data Analyst role to grow in analytics and reporting.

## EXPERIENCE

**Software / Systems Analyst Intern** — SYS-DAT Group Oct 2025 – Mar 2026

- Supported issue investigation and bug fixing across ERP modules with dev/support teams.
- Wrote and refined SQL queries to extract data for reporting and troubleshooting.
- Worked with large relational databases and followed internal processes (tickets, testing, documentation).
- Adapted to structured development processes: tickets, testing, documentation, and release routines.

**Data Analytics Projects (Personal / Freelance)** — Personal Portfolio Jul 2024 – Present

- Built portfolio projects using SQL and Python: data cleaning, EDA, and simple reporting.
- Wrote short summaries focused on KPIs, key factors, and next-step recommendations.
- Used reproducible workflows (Jupyter notebooks, Git, documentation).

**Project Coordinator** -Startup — WebWiseItalia Mar 2023 – Jul 2024

- Coordinated day-to-day delivery in a small team, translated requirements into clear tasks, priorities, and deadlines.
- Supported data-informed decisions with basic analysis of internal/public datasets (trends, simple KPIs, summary reporting).
- Tracked tasks and blockers and shared regular progress updates with stakeholders.

## PROJECTS

Customer Churn Analysis & Prediction - Banking Dataset

- End-to-end project: EDA, feature engineering, and model evaluation with scikit-learn; focus on interpretability and business relevance.
- Identified key churn drivers and customer segments; communicated insights with clear visualizations and narrative.

## SKILLS

**Data Analysis:** SQL, Python, pandas, NumPy, Data Cleaning, EDA · **Visualization & Reporting:** Excel, Power BI, Matplotlib, Seaborn · **ML Foundations:** Scikit-learn, Feature Engineering · **Tools:** Git, GitHub, Jupyter, VS Code, MySQL Workbench

## EDUCATION

University of Camerino (UNICAM) — BSc Computer Science (in progress)  
Erasmus — Universidad de Sevilla — Computer Engineering | Sep 2022 – Feb 2023

## CERTIFICATIONS

- SQL for Data Analysis — Maven Analytics
- Machine Learning A–Z — SuperDataScience
- Google AI Essentials — Google
- English B2 — Cambridge
